Weather of Concern

- Increasing upper level high pressure to the east will bring southeast monsoonal flow into Southern California for possible afternoon and evening thunderstorms today through Wednesday.
- Strong gusty winds and low relative humidities will result in critical fire weather conditions from this afternoon through this evening for portions of Modoc County.

Active Weather Warnings, Watches and Advisories by County:

SITUATION SUMMARY

Strong Petroleum Odor/Sheen, Summerland, Santa Barbara County, SPILL 15-4883 (Final)

On 08/20/15 at 1259 hours, Santa Barbara County Environmental Health advised of a strong petroleum odor and sheen at Summerland Beach located near Lookout Point. The beach extends eastward towards Loon Point. Source of release was unknown and samples were collected to be analyzed.

- On 08/21/15, Cal OES SDO advised that Santa Barbara County Public Health Department issued Press Releases for the Closure and Warning for Summerland Beach.
- As a result of Spill Report 15-4883, the United States Coast Guard (USCG) responded to the release. They sampled the oil in the water and sent it off for analysis. During their investigation, USCG determined that though the release is more than expected for typical natural seepage, there are no other land-based oil or pipeline issues in the area which could account for the release. Therefore, they still believe that the release is a result of natural seepage, but that a contributing factor could be the fact that the offshore platforms were all shut down during the Refugio incident, and increased pressure in their lines and resulting seepage could be responsible for some portion of the oil found in the water and at Summerland Beach.
- There were no requests for assistance or unmet needs. The California State Warning Center conducted all appropriate notifications, including but not limited to local government agencies.

On 08/24/15, Cal OES SDO advised that Santa Barbara County Public Health Department issued a Press Release for the reopening of Summerland Beach. Per the Press Release:

- The Public Health Department has re-opened Summerland Beach to the public. The beach was closed on Friday, August 21, due to the volume of oil on the beach and sand along with the petroleum odors on the beach which posed possible adverse health effects. Oil and odors have decreased due to tide activity and natural processes, thus immediate health concerns have diminished. Warnings remain in effect as the situation with oil and odors can change rapidly. It is recommended that people and animals avoid exposure to crude oil compounds and strong odors.
- The Public Health Department has been monitoring the beach on a daily basis assessing the quantity of oil, the nature of the oil and the presence of odors that may impact health. The Air Pollution Control District continues to partner with Public Health to assess the conditions of the air and potential exposure through inhalation. The primary concern is first and foremost to protect public health.
- In addition to monitoring, both the Public Health Department and Air Pollution Control District have taken water, sand and air samples for testing. Testing results take a number of days and reflect findings from the date on which the samples were taken. These tests provide a perspective of the trends in the quality of the ocean, land and air.
- There are seeps and old oil wells in the area, either of which may be the cause of the recent oil on Summerland Beach. Long-term analysis and evaluation will be required to make determinations as to the source of the increased oil and odors. While the source of the oil will be important for developing long-term solutions, the Public Health Department and Air Pollution Control District will remain vigilant in timely posting of warnings and closures when there is a potential risk to public health.

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA

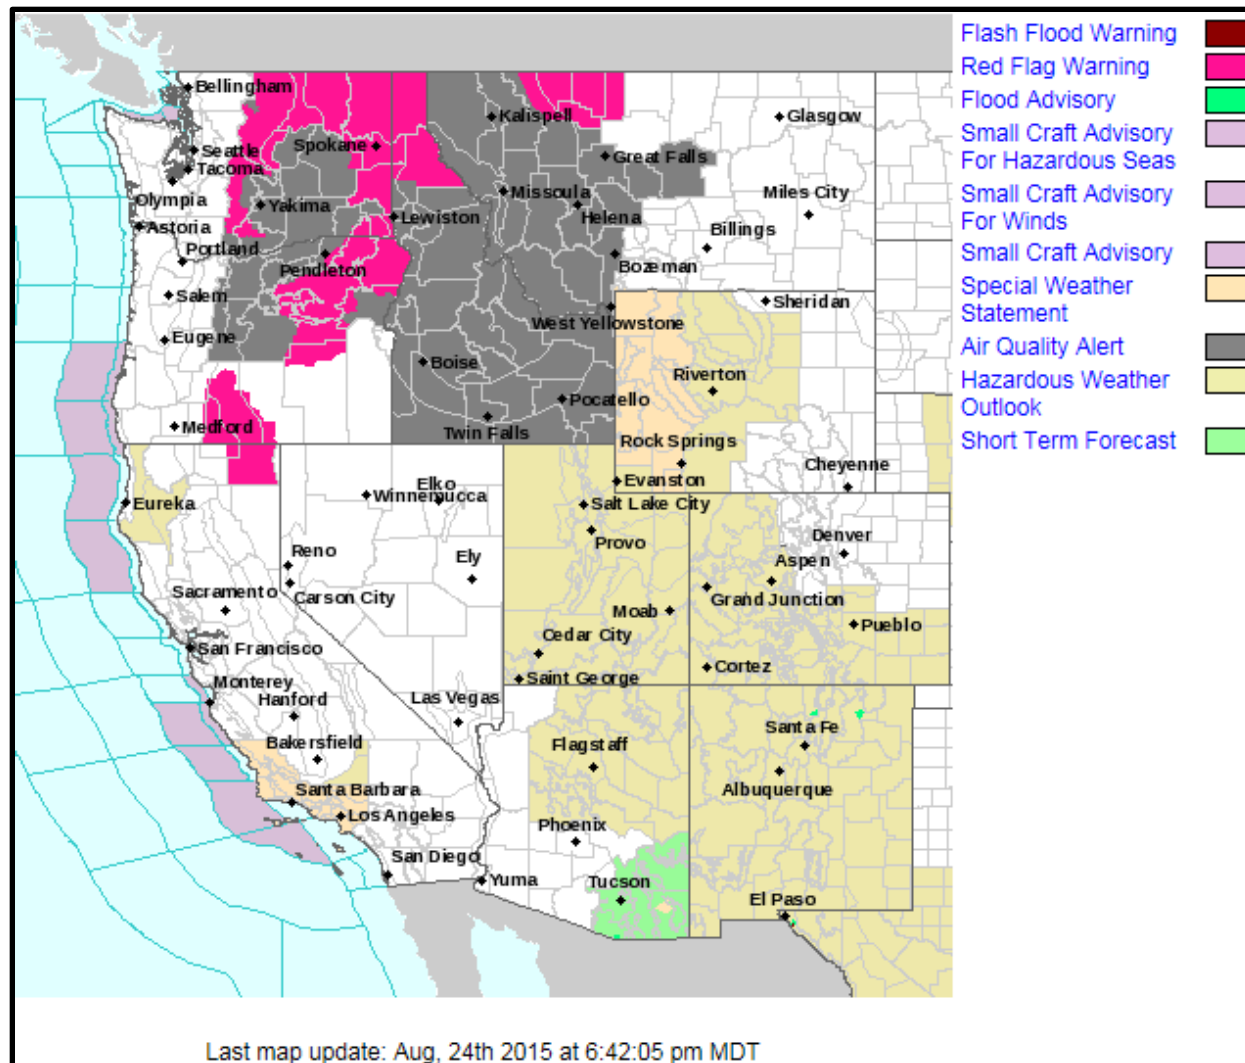

Low pressure deepening offshore will produce cooler and more humid conditions this week. A southerly to southwesterly flow aloft will strengthen and gusts could reach 30-35 mph over higher and exposed terrain beginning this afternoon. There is a slight chance of afternoon showers or thunderstorms in far northwest California each afternoon beginning today, with better chances north of the Oregon State line. Smoke from active fires in northwest California will tend to drift to the north and northeast each day, with inversions likely to break earlier than in recent days. This pattern will provide venting which will likely lead to more active fire behavior. Current computer forecast models are indicating a possibility of limited monsoon moisture moving northward and producing isolated thunderstorms with light rainfall in the Bay Area and Lake Tahoe regions Tuesday night and in eastern areas on Wednesday. Chances of this are slight (10%) and areal coverage will be quite limited in the North Ops region, if thunderstorms develop at all. Computer models are also showing a cold front associated with the trough moving through the northern California area Friday and Friday night with scattered light rain. The trough is expected to remain over the area into early next week and produce occasional showers in northwestern and northern areas.

SOUTHERN CALIFORNIA:

Southeast flow aloft around strong high pressure over the Four Corners area will cause an increase in moisture across Southern California south and east of Los Angeles County through Wednesday. Isolated afternoon showers and thunderstorms will be possible over the Cleveland National Forest and near the Colorado River late this afternoon. The shower and thunderstorm activity will increase tonight and Tuesday south and east of Los Angeles County, primarily over the mountains and deserts. However, some of the activity may make it into the coastal and valley areas. Thunderstorms will decrease Wednesday and be focused from the mountain ridges eastward to the Colorado River and all of the activity will end by Thursday. Temperatures will be up to 5 degrees above normal through Thursday, with upper 70s and 80s in the mountains and 90s to 102 in the valleys. Minimum relative humidity will be mainly between 12% and 25% away from the coastal areas through Thursday. A trough will move inland across the Pacific Northwest bringing a cooling trend and a small increase in relative humidity to most of the region Friday through this weekend. Westerly winds of 15 to 25 mph with gusts to 40 mph will surface across the mountain ridges and desert passes Friday afternoon through this weekend. The marine layer will deepen starting Friday and morning low clouds and fog will make it into most coastal valley locations by Saturday morning.

SITUATION SUMMARY

FIRES, SOUTHERN OPERATIONS AREA

Rough, Vegetation Fire, Fresno County

Location: 5 miles north of Hume Lake and 2.5 miles southwest of Spanish Mountain

Jurisdiction: FRA

Start Time: 07/31/15 at 1933 hours

Per Cal OES, CAL FIRE, and ICS-209 as of 08/24/15 at 1800 hours:

- 51,794 Acres, 17% Contained

Evacuations/Shelters:

- Mandatory Evacuation Areas:
 - The Hume Lake Christian Conference was evacuated 08/18/15. Per the Cal OES Law Duty Officer (LDO) evacuation was accomplished in less than 2 ½ hours due in significant part to prior planning between Fresno Sheriff and the Camp Staff. The group of 750 to 1000 people were evacuated to a sister Church in Fresno for sheltering.
 - There are 250 mandatory evacuations in the National Park Campgrounds in the immediate area of Hume Lake Christian Camp.
 - There has been an evacuation of 32 private residences, believed to be all vacation homes in the Big Meadow and Heart Meadow Neighborhood.
 - Approximately 1,500 campers in several Kings Canyon National Park Campgrounds located along 10 Mile Rd have been placed under mandatory evacuation.
- EOC Activations: Fresno County EOC is activated at Level 2 from 0730-1800.
- The California Highway Patrol has also moved the road closure, which had been located at the intersection of Highway 180 and Hume Lake Road. The new road closure now sits further south on Highway 180 at Grant Grove Tree (approximately 2 miles north of the Hwy. 180 and Hwy. 198 interchange). The roadway will remain closed until authorities determine it is safe to reopen. The Sheriff's Office wants to make the public aware that no one will be allowed to enter the Hume Lake area; people will only be allowed to exit.
- Per CUEA, PG&E critical facilities and distribution assets are no longer in a high risk category for threats to power serving Central California. CAISO has reviewed PG&E facility locations that may be impacted by the fire and none of the locations would compromise the grid in any capacity. There would be no brownouts if these sites were impacted.

CAL OES MISSIONS

Ongoing Cal OES Missions

- **2015-LAW-15570 08/22/15, 1111 hours:** Fresno County Sheriffs' Office requested a helicopter for a high altitude search mission, 11,500 feet. Missing Person (MP), 63 year old female, was last seen on Thursday, 08/20/15, at 1300 hours by individuals within her hiking group near Wishon Reservoir. The California National Guard (CNG) accepted the mission to insert SAR personnel into the search area and provide night time search efforts using night vision equipment along with hoist capability. CNG arrived in the area but was unable to assist due to heavy smoke from the Rough Fire. CNG committed to a second day of search efforts, 8/23/15, for an early morning flight into the search area, 0630 hours. In addition, MIGU-5 and 3 ACS Staff are deployed assisting with communications support. **Update:** CNG committed to a second day of search efforts, 08/24/15, for an early morning flight into the search area, 0630 hours. **Mission Ongoing.**
- **2015-LAW-14555 08/03/15, 0800 hours, Update: 08/19/15:** Due to the continued fire activity with the five different complex fires within Trinity County, the Trinity County Sheriff is making an additional LEMA request for 16 sworn LE personnel with marked patrol units to assist in perimeter control, traffic control, evacuations, and security. This is for another operational period of 8/22/2015 thru 8/28/2015 to relieve the current Op period. Cal OES LEB is coordinating with Region's 2, 3, and 4 RMAC for the additional LEMA request. No changes to current evacuations and road closures. Additionally, per T-Comm they will continue to support the requested additional operational period with the MIGU, cache of hand held radios, and technicians. There are no other significant changes amongst the other fires in the Trinity Complex Fire. **Update: 08/21/15:** Regions 3 & 4 LE RMAC's are supporting the Trinity County Sheriffs' Office LEMA request with the following agencies responding for the operational period of Aug. 21 -28, 2015; 1. Sacramento Co SO – 4, 2. Folsom PD – 4, 3. Stanislaus Co SO – 4, 4. El Dorado Co SO – 5, 5. Modoc Co SO – 2. T-Com is continuing to support the Law Mission's additional operational period, Aug 21 – 28, utilizing the R III MIGU, cache of hand held VHF radios in addition to ACS technicians at the ICP. There are no other significant changes amongst the other fires in the Trinity Complex Fire. **Update: 08/22/15:** The LEMA resources from operational period 8/15-8/21/2015 are demobilizing this morning. Law Enforcement Mutual Aid resources for this operational period, 8/22-8/28/2015, have arrived from Regions 3 & 4 RMAC's to support Trinity County Sheriffs' Office. **Mission Ongoing.**

Sacramento County Sheriff's Department is responding with the requested resources. **Update: 08/23/15, 1700 hours:** [Vehicle recovery was completed and all resources have been released.](#) **Mission Closed.**

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
